Joshua Delsman

1775 North Andrews Square, #110W, Fort Lauderdale, FL 33311
jdelsman@voxxit.com

PERSONAL PROFILE

To obtain a senior-level web developer position in a growth-oriented, progressive web firm. I aim to bolster my user interface (UI) design, expert front-end coding, and IT management skills, as well as to further my object-oriented programming experience working with web application projects. My ideal environment would be fast paced and team-oriented, with precedence given to fostering professional development and achievement.

EDUCATION

Florida Atlantic University - Boca Raton, FL
Pursuing Computer Science (B.S.) degree - 2008 to Current

Suffolk University - Boston, MA
Business & Marketing (B.S.) degree - 2007 to 2008

William T. McFatter Technical Center - Davie, FL
New Media/Graphic Arts - 2003 to 2007

EXPERIENCE

Front-end Web Developer, Destination Rewards - 2008 to Current
Worked with many Fortune 100 companies to develop incentives and royalty platforms to represent their business model, and incorporate their branding. Coordinated a team of developers to handle front-end tasks on a daily basis, and spearheaded operations which included full-scale enterprise design and Ruby on Rails application development. Frequently trained employees and lead interactive workshops on the latest design & development methodologies and best practices.

Owner, Voxxit, LLC - 2003 to 2008
Oversaw daily operations, including comprehensive wire-framing, web design, web development, implementation, and quality assurance/testing. Additionally, responsibilities included business development, sales and billing.

Systems Administrator, Lunarpages, Inc. - 2006-2007
Responsible for assisting the company in monitoring and administering over 1,000 shared and dedicated servers at any given time, concurrently serving over one million customers. Took part in developing Bash and Ruby shell scripts to assist with repetative administration tasks. Frequently consulted with large enterprise clients for scaling their web presence with clusters of over 5 servers and beyond.

Web Designer, Site5 Internet Services, Inc. - 2005-2006
Designed and redesigned multiple web presences, including the main corporate web site, engineering blog, web control panel for end-users, and several other internal projects.

PROFICIENCIES

Web UI Design
• Hand-coded HTML 4.01 & XHTML 1.0 (Strict)
• CSS 1, 2.1 & 3
• Standards compliancy
• Wireframing
• Designing & implementing accessible web user interfaces
• E-mail design & coding for web & GUI clients
• Search engine optimization (SEO)
• Cross-platform compatibility
• Flash 8+
• AJAX
• Usability Studies

Web Development
• JavaScript & jQuery/Prototype frameworks
• Ruby
• Ruby on Rails
• PHP & Smarty
• CVS, Subversion & Git
• Bash scripting
• MySQL
• XML, YAML & JSON
• Basic understanding of Java/JSP principles

System Administration
• Mac OS X Client/Server
• Microsoft Windows 2000/2003/XP/NT
• UNIX/Linux (CentOS, RedHat, Debian)
• FreeBSD 4/5
• Web server optimization/clustering
• cPanel/DirectAdmin/Plesk
• TCP/IP networking
• BIND DNS Service
• FTP/WebDAV/RSYNC/SCP
• Apache/LigHTTPd/nginx + Mongrel
• Nagios Server Monitoring
• APF/BFD/SIM/Rkhunter (UNIX Security)
• Asterisk PBX/VoIP

Graphic Design/Other
• Adobe InDesign/Photoshop/Illustrator
• Macromedia Dreamweaver
• Microsoft Office Suite
• Customer Relationship Management (CRM)
